PCTO 2024 Report

Tommaso Brocanelli 5bm

Where?

I did my PCTO in Corinaldo, in the IT company TDS (Techno Data System), a company that deals with computer repair and software design, especially mobile applications

First period

In the first period in the company, from May 17th to June 8th I did simple manual tasks by putting my hands on the customers' computers and in particular in the restoration of the components

Second period

In the second period in the company, from September 9th to 21st, I did simple tasks of managing company services

For example, I implemented the WhatsApp Web service for customers who have a sub to the antivirus service

What did i learn?

In this PCTO I learned little about the programming part or specific jobs but I learned how it feels to be in a workplace and the way of working of a local company that operates in the field of software engineering and hardware repair, having the opportunity to also observe how employees compare and relate to each other.
